30 September 2019

## South Island Influenza and Respiratory Pathogens Report

Week 39, ending Thursday 26 September 2019

## **Key points**

- Community influenza-like illness rates are now low in all South Island DHBs
- Canterbury influenza identifications are also low
- This is the final South Island influenza and respiratory pathogens report for the 2019 season
- Feedback on our reports and any suggestions for 2020 are welcome. Please contact daniel.williams@cdhb.health.nz

Influenza viruses and Respiratory Syncytial Virus (RSV) in Canterbury					
Influenza type	This week	Last week	RSV	This week	Last week
