| Gastroenteritis            | 2                    | 1     |        |      |          |          |         | 1           |              |        |           |        |           |         |
| Hepatitis B                | 1                    |       |        |      |          |          |         |             |              |        |           |        |           |         |
| Invasive pneumococcal dis. | 1                    | 2     |        |      |          |          |         | 1           |              | 1      |           |        |           |         |
| Legionellosis              | 1                    |       |        |      |          |          |         |             |              |        |           |        |           |         |
| Rheumatic fever            |                      | 1     |        |      |          |          |         | 1           |              |        |           |        |           |         |
| Salmonellosis              | 2                    | 1     |        |      |          |          |         |             | 1            |        |           |        |           |         |
| Taeniasis                  |                      | 1     |        |      |          |          |         |             | 1            |        |           |        |           |         |
| Tuberculosis - new case    | 2                    |       |        |      |          |          |         |             |              |        |           |        |           |         |
| VTEC/STEC infection        | 5                    | 1     |        |      |          |          |         | 1           |              |        |           |        |           |         |
| Yersiniosis <sup>C</sup>   | 4                    | 15    | 1      |      |          |          |         |             | 7            | 3      | 3         | 1      |           |         |

Notifications include confirmed, probable and suspect cases as at the above indicated time when data are extracted from EpiSurv. COVID-19 notifications are not being reported at the level of territorial authority. Zika notifications are only being reported nationally.

<sup>C,S,W</sup> The trend of the incidence of this disease in either Canterbury (c), South Canterbury (s) or West Coast (w) has been graphed (see following pages) because it either has been flagged by the Early Aberration Reporting System (EARS), or is a disease of interest.

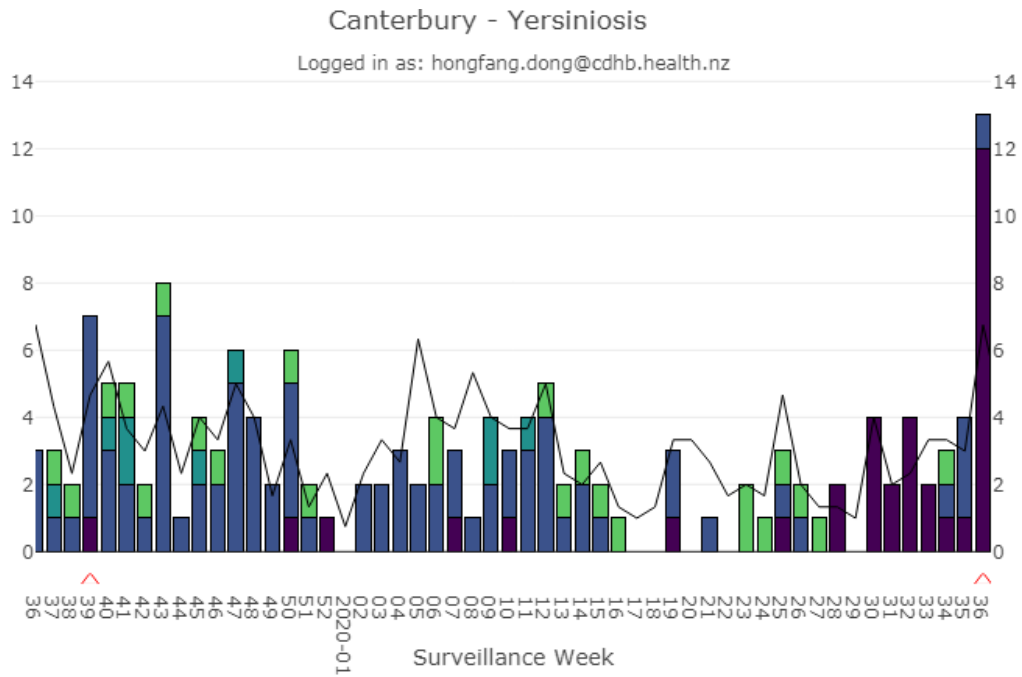

### Outbreak reports in the two weeks ending 4 September 2020

| Outbreak Number | Report Type | Condition                          |
|-----------------|-------------|------------------------------------|
| OB-20-108986-CH | Interim     | Unknown                            |
| OB-20-108987-CH | Interim     | Gastroenteritis / foodborne intox. |

**Key to the symbols for the graphs of incidence trends**
